

EMEC MACHINE TOOLS INC ANNOUNCES DISTRIBUTION AGREEMENT WITH GEMINIS

For Immediate Release

Mississauga, Canada March 15th, 2022. EMEC Machine Tools, Inc. is delighted to announce the partnership agreement for distribution, service and support of Geminis Lathes. The Geminis product line complements our existing lines of top-quality machine tools to allow us to better serve our Canadian customers. EMEC will distribute GEMINIS products on an exclusive basis across the provinces of Manitoba, Ontario, Quebec and the Maritimes.

Geminis is based in Elgoibar, Spain and is a leader in large capacity, heavy-duty turning solutions that are customizable for simple to complex applications. The Geminis product range includes large flat-bed CNC lathes for part diameters up to 138" and part lengths up to 945". Machine configurations include; turning only, turning with live tooling + C-axis, Y-axis, and heavy-duty milling columns. Multitasking options include turning, milling, grinding on a single platform with tool changing systems.

Design values of Geminis Lathes:

RELIABILITY – Based on robust structure, in house machining and first-class suppliers

HUMAN CENTERED DESIGN – By means of Ergonomics, order and cleanliness and eco design

SPECIALIZATION - Through design and application engineering teams, multiprocess solutions and design flexibility to adapt the machines to the customers need.

EMEC will be responsible for sales, service, parts, training, and applications support for Geminis customers within EMEC's territory. EMEC has a combined team of 20 service and applications technicians between the Mississauga and the Montreal offices

"We at EMEC are excited by this new addition to our product line and are confident our new partnership with Geminis will be a success. The Geminis line of products will allow EMEC to serve manufacturers engaged in the production of large complex turned parts used in industries such as power generation, railways and heavy industry. Known for high quality construction and innovative engineering Geminis is a world leader in large capacity, heavy duty multi-processing lathe technology. We look forward to working with the Geminis team to provide our customers with some exciting new solutions." Bill Mara, President of EMEC.

"Canada has always been an important market for Geminis. And while we always want to partner with a distributor that can help us sell machines, we really focus on those that do a great job taking care of the customer. EMEC has the capability and the track record of doing just that – before, during, and after the sale," said Iosu Unzueta, General Director of Geminis Lathes, S.A..
