FLP | FP | FS

Productivity Line

Productive. Flexible.

SORALUCE

As part of our premium solutions, the **Productivity Line** floor type milling machines of Soraluce allows productivity to be taken to the next level, providing the **maximum stock removal capacity and the highest versatility** in the market.

Productive Flexible Heavy-duty

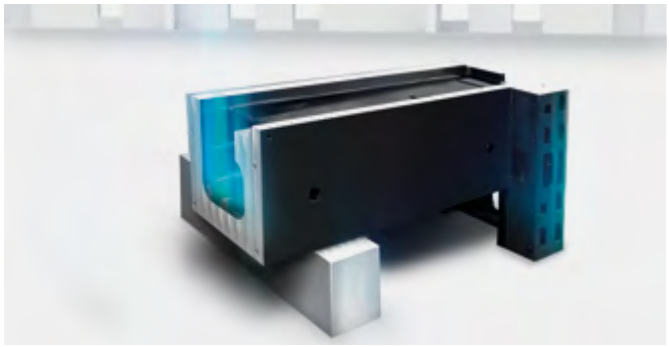
FLP | FP | FS: Floor type milling machines

Nine reasons to choose Productivity Line

01.

A winning combination

The most rigid and dynamic solution on the market

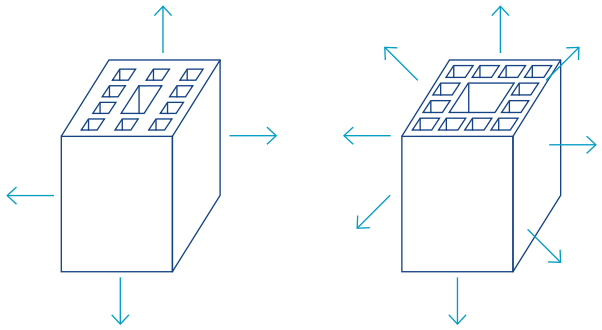


Full cast iron

Long term stability.

Thermostability

— Expansion under control: quantity, speed, direction.
— Vibrations absorption, damping capacity.
— No need of electronic compensations.
— Best performance against temperature variations.
— Main structure: column, saddle, ram.



Cast iron

Fabricated steel

Linear guiding

Lifelong durability.

— Soraluce is a pioneer in the use of linear guiding systems in large machines and heavyduty applications.
— Design proven since 1991.
— Lifelong durability > 10 years maintenance free at maximum performance.

TOP BENEFITS	Linear guiding	Prismatic guiding	Hydrostatic guiding

Full cast iron

— Accuracy
— Stiffness
— Productivity

Linear guiding

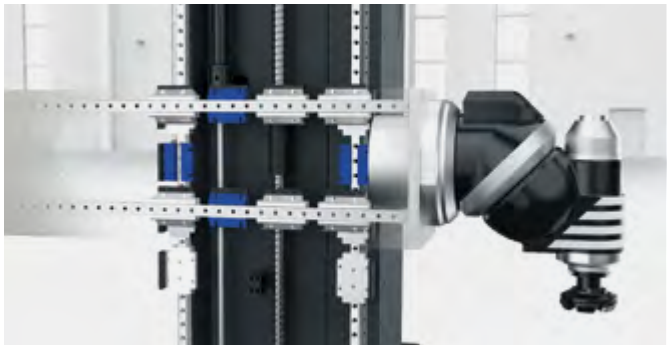
— Best precision
— High dynamics

DAS+

— No chatter, best stock removal rate
— Optimized process thanks to real time vibration surveillance

Damping pads

— Stability during machining process
— Vibration absorption



Damping pads

Great stability.

— Own development of special damping pads combined with linear guides.
— Eliminates any vibration during machining processes.

DAS+

No chatter.

Active damping system

— 100% cutting capacity through the complete workpiece volume.
— Reduced cycle time up to 45%.
— Increased productivity up to 300%.
— Improved surface quality.
— Extended tool life.
— Machine protected: long term precision as reduces machine's key components wear (ballscrew, guideway, gearbox, head), in both roughing and finishing operations.

How does DAS+ work?

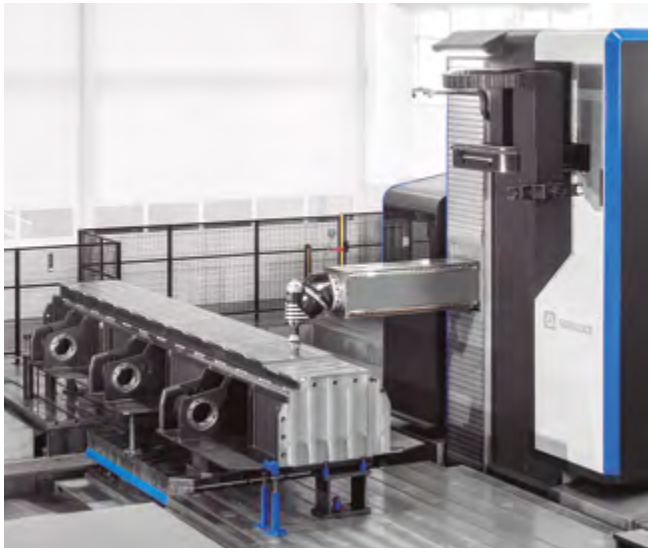
DAS+ is a smart system which oversees the machining process and selects the best technological alternative to eliminate chatter:

— Active damping in the ram.
— Spindle speed tuning by automatic selection of optimum speed.
— Harmonic oscillation of spindle speed.

02.

Next level technologies

Best stock removal



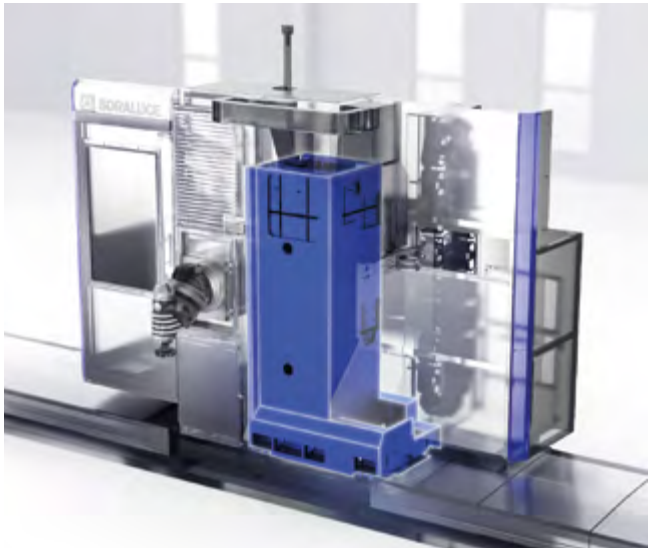
— Best stock removal with extended ram.
— Great cutting capacity through the complete workpiece volume.

Results FLP Z: 1300 mm | 51”
FP & FS Z: 1600 mm

Stable working conditions, material DIN CK45. DAS+ OFF.

Ø 125 mm | 5” face milling tool	Ap= 5 mm | 0.2” Ae= 100 mm | 4” F= 2020 mm/min | 79 in/min Q= 1010 cm^3/min | 62 in^3/min Power consumption: 100% (37 kW | 49 HP)

Monoblock structure



+ Rigidity:

— Column and longitudinal carriage in one piece for maximum stability.
— The best behavior against torsion and bending.

Column size 3 times larger than box-in-box concept.

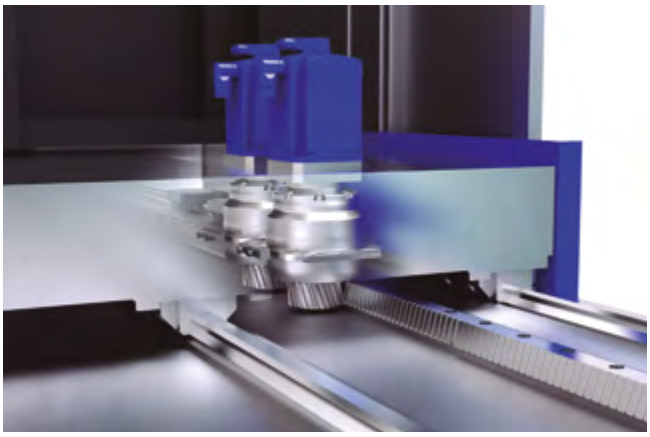
Driving system

Reliable
Double rack and pinion system in the longitudinal axis. The best existing solution for long travel axes.

Dynamic
Up to 35,000 mm/min. | 1378 in/min.

Long term accuracy
— No backlash, no wear.
— Highest surface quality.

Maintenance free
Automatic lubrication of the rack and pinion system.

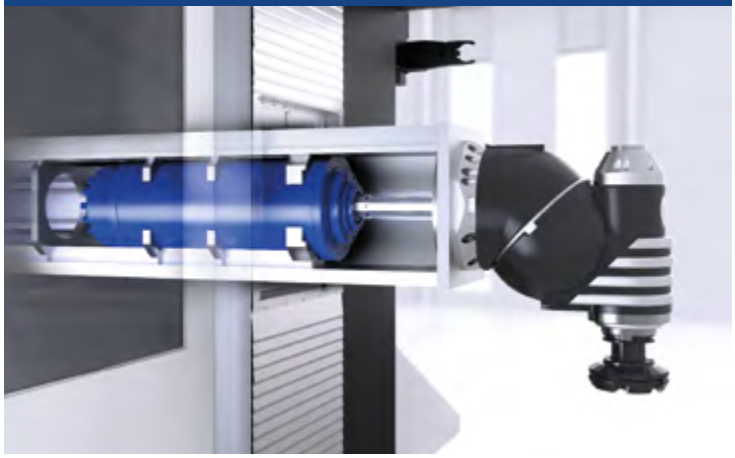


Inline spindle motor

— High efficiency.
— Minimum noise level.
— High performance thanks to optimized power-torque curve.
— Full power at low rpm.
— Short distance between main motor and head trasmission.

Compact-design transmission shaft.
Placed at the front of the ram close to the head.

Up to 60 kW | 80 HP



Best reliability
No belts, no reducers, neither long transmission bars.

Great precision
Best thermal stability provided by cooled inline motor.

Enhanced rigidity
Frontal assembly, all sides of the ram are solid.

Ease of maintenance
Quick exchange of the main spindle motor.

03.

Accuracy in the DNA

Increased effective stiffness

Design is conceived to obtain the best precision and rigidity. We keep maximum quality control of manufacturing and assembly until its final verification, using Smart 3D thermal compensation of the machine.

01 Stiffness forces triangle

— Compact saddle for best rigidity.

— The cutting forces are transferred directly from the cross axis roller bearings to the column, minimizing the deformation of the saddle.

— Special Soraluce saddle design with minimum distance between the ram and the column, providing excellent stability, precision and maximum cutting capacity.

— Ram saddle fully guided.

02 Torsion and deformation under control

— Provided by the best guiding system in the market.

— Straightness ensured through a perfect parallelism between guides supporting surfaces.

— Lateral ram torsion constrained by special ribbed design cast iron ram, all sides being solid.

— Full control over ram drop and flexion.

Torsion movement

03 Minimum distance

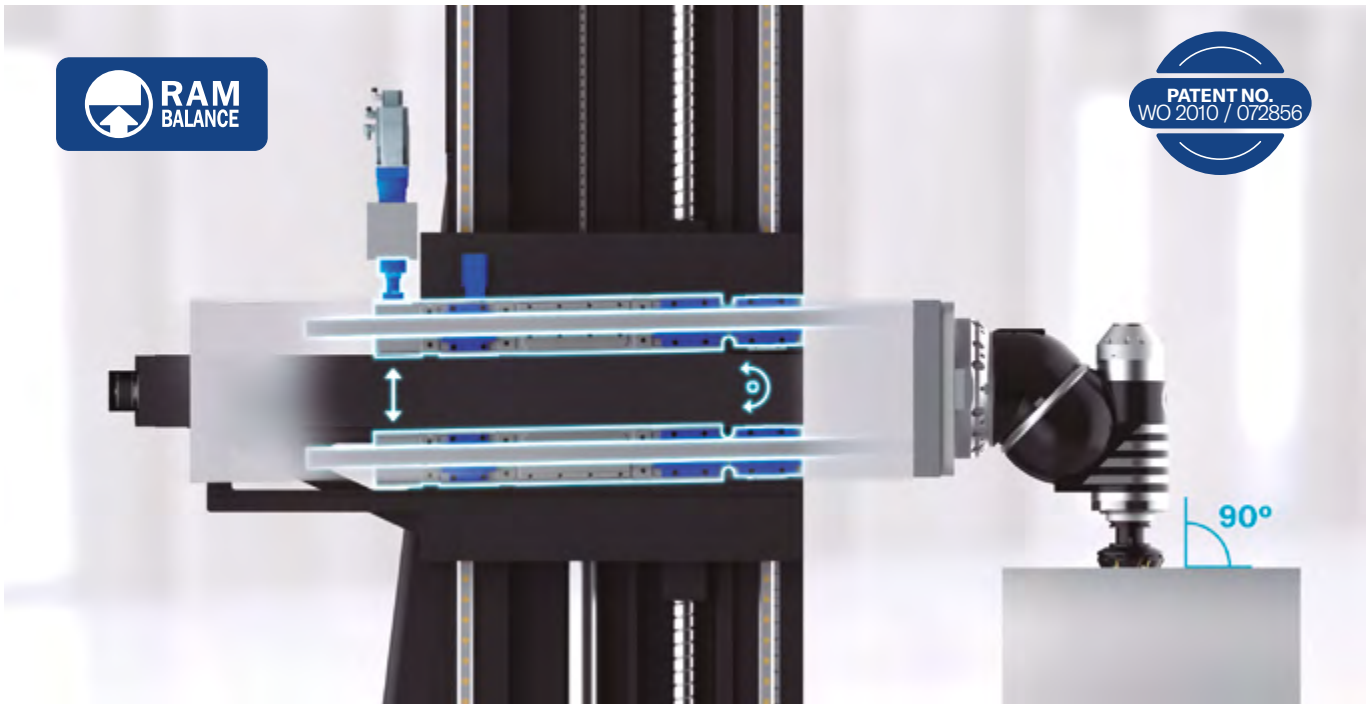
— Short distance from the column to the tool, thanks to the arrangement of the ballscrew and counterweight system.

— Minimum machine overhang.

04 No compensation

— Ram drop under control without electronic compensation.

Superb precision in positioning



* Available for FP and FS models

The system compensates the angular deflection of the ram caused by the weight of the moving components when they travel along the vertical and cross axes.

Basic system set-up

— NC controlled.
— Direct measuring system.
— Up / down ram movement through electromechanical system in the saddle.

Benefits

— Improves accuracy, straightness and parallelism when vertical and cross axes are moved.
— Real time compensation for different head weights: Maximum guaranteed accuracy, straightness and parallelism for every head in the machine.

Ram drop less than 0.03 mm | 0.0011” with 1900 mm | 74” extended ram

04.

Smart Technology

ACCURA HEADS

Automatic re-setting of head kinematics to increase accuracy. It compensates the head articulation positioning deviation for one particular position of the head.

+ ACCURACY

ADAPTIVE CONTROL

Smart and automatic setting of defined cutting parameters according to actual machine power consumption.

30% time saved in roughing process!

+ PRODUCTIVITY

DAS+

Eliminates any chatter that may arise during the machining process.

Machine protected: long term precision as reduces machine's key components wear.

+ PRODUCTIVITY

Patent no. EP 3017911

DWS

Eliminates chatter originated on either fixtures or workpieces.

+ PRODUCTIVITY
+ QUALITY

Patent no. EP 3226089 B1

ENERGY SAVE

Energy save Package

+30% save
on energy consumption

You decide how and when the different components of the machine are switched on / off!

— Spindle
— Axes
— Machine power
— Control
— Lightning
— Air supply
— Hydraulic parts
— Warm-up program
— Calendar planning

RAM BALANCE

NC controlled dynamic correction to improve ram geometrical accuracy, straightness and parallelism when vertical and cross axes are moved.

Ram drop less than 0.03 mm with 1900 mm extended ram

+ ACCURACY

Patent no. WO 2010 / 072856

VSET by SORALUCE

Fast and simplified component set-up.

+ PRODUCTIVITY

Patent no. EP 2570236 B1

TBS

Hydrostatic table balancing system to correct distribution of asymmetric loads.

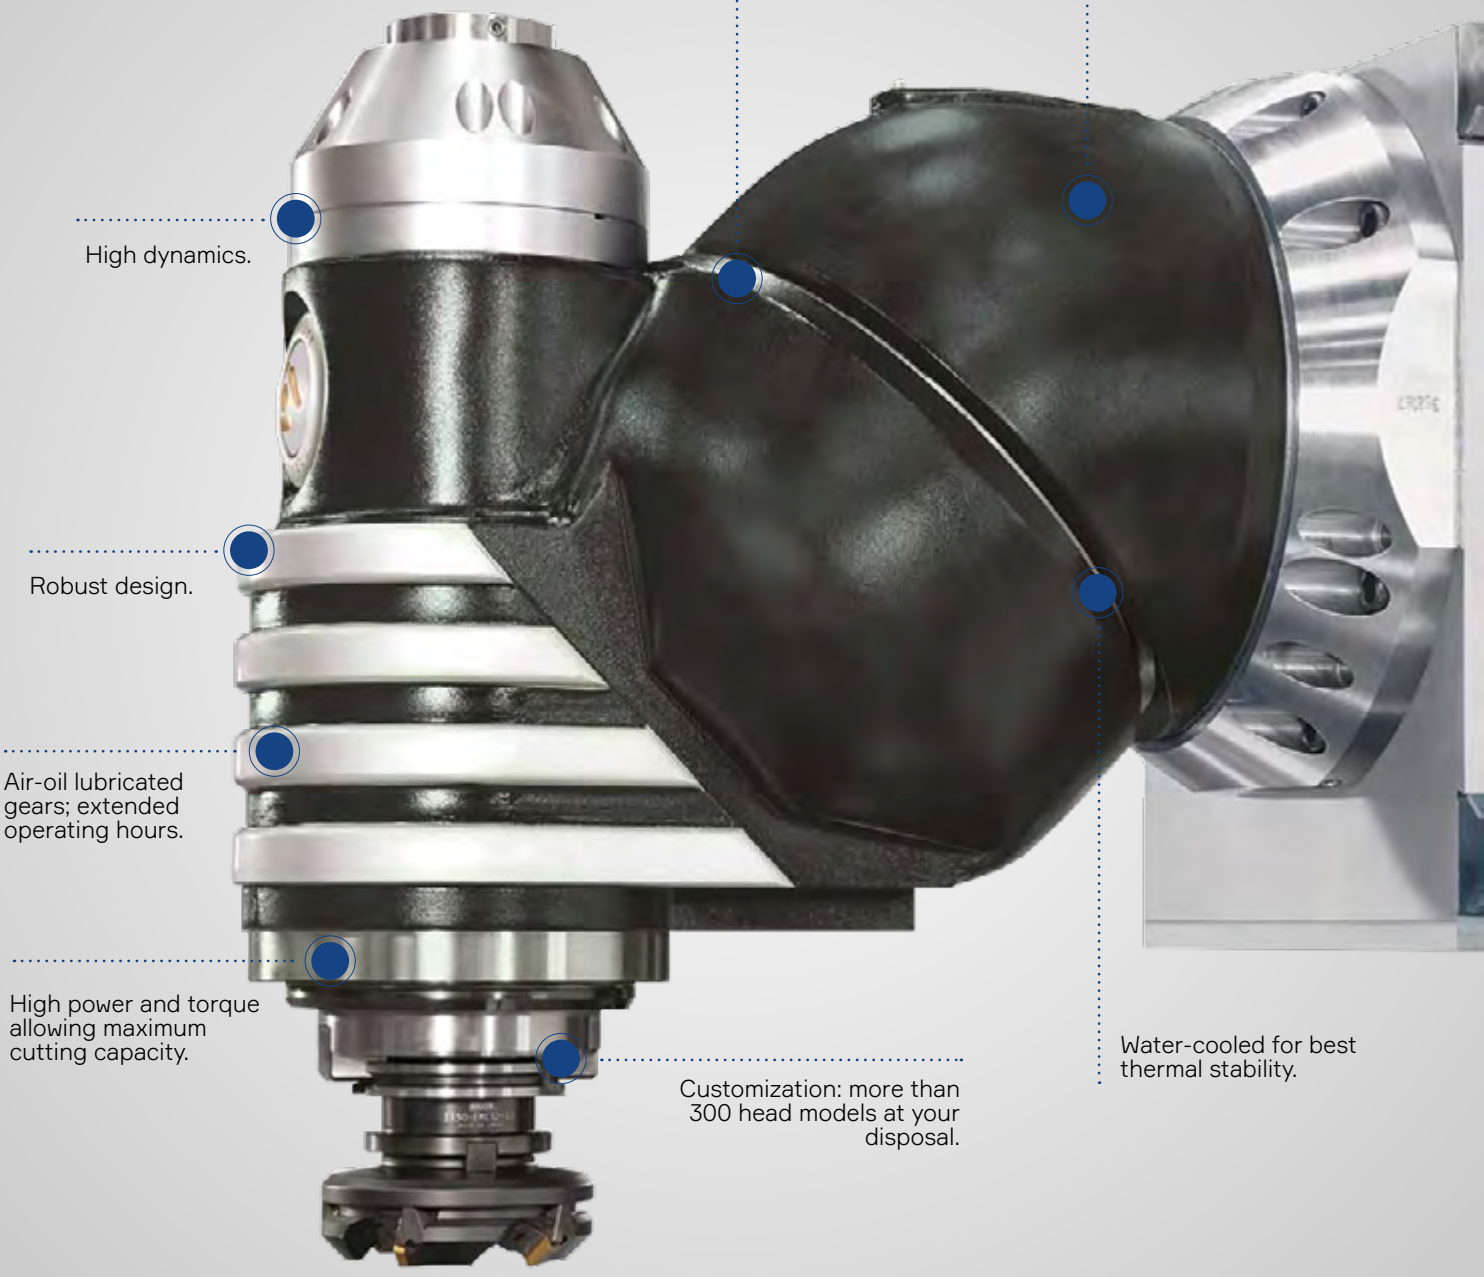
+ ACCURACY

05.

Soraluce heads

More than 300 head models

Precision & High performance



The most advanced head manufacturing center

In-house made

Design — Machining — Assembly — Verification — Running-in

Head service hubs

— Your trusted service partner.
— Know-how directly from the manufacturer.
— Maintenance & repair.
— Spare head service available.

Heavy-duty heads
Cooled oil lubrication

— Up to 60 kW | 80 HP (S1-100%).
— Robust performance.
— Highest reliability.
— Long-life design (wear-free gears and bearings).
— Maintenance free.
— Thermal stability.
— Quick change for maintenance purposes.

High performance heads
Air-oil lubrication

— Up to 37 kW | 49 HP (S1-100%).
— High speed up to 7000 min^{-1}.
— Optimum accessibility thanks to reduced size.
— Robust performance.
— Highest reliability.
— Fast positioning.
— Thermal stability.
— Quick change for maintenance purposes.

Thousands of possibilities

Universal head

37 / 60 kW | 49 / 80 HP (S1)
2.5° x 2.5° / 1° x 2.5° / 0.001° x 0.001°
6000 / 7000 min^{-1}

Multitasking head

37 | 49 HP (S1)
2.5° x 2.5° / 0.001° x 0.001°
5000 / 6000 / 7000 min^{-1}

Orthogonal head

37 / 46 kW | 49 / 61 HP (S1)
1° x 1°
6000 / 7000 min^{-1}

5-axis continuous head

Up to 60 kW | 80 HP (S1)
0.001° x 0.001°
Up to 7000 min^{-1} (mechanical) /
Up to 30000 min^{-1} (electrospindle)

Fixed Horizontal Boring Head

43 / 46 / 60 kW | 57 / 61 / 80 HP (S1)
4000 / 5000 min^{-1}

Quill

Ø 130 / 150 mm | 5" / 6"
40 / 53 / 54 kW | 53 / 71 / 72 HP (S1)
3500 min^{-1}
Available in FP and FS models

Orthogonal Head

Compact design, conceived for machines with inline motor.

— Inverse machining capacity: up to -45º
— No additional set-ups.
— Improved cycle time.
— Better finishing quality.
— Minimum manipulation.
— Full advantage of machine travel.
— Same distance from spinde to table during lateral and front milling.

Head changing system

— Rapid.
— Accurate.
— Applicable to any head.
— Universal system: heads are fully standard.
— No downtimes: head´s pick-up fully covered to protect inductive detectors from chips and coolant.
— Available for FP and FS models.

Fully modular system through adapter flanges.

06.

Multitasking

All in one: milling, turning, grinding and gear cutting in a single machine.

— Improved machining accuracy and overall part quality.
— Significant reduction in production lead time.
— Cost benefits: fewer fixtures, tools and labor requirements.
— Single machine investment for multiple processes.
— Optimized use of floor space.
— Machining of several morphologies, sizes and complexities.
— Improved precision due to minimum workpiece set-ups.
— Fewer operators involved in the machining process.

Milling & Turning Tables

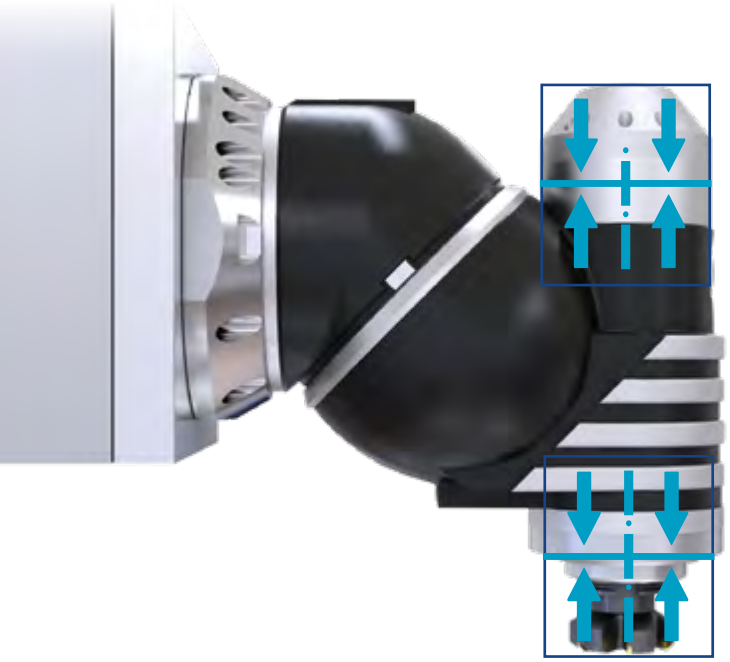
< Ø 2000 mm | 78"	Ø 2000 ÷ 3500 | 78" ÷ 137"
up to 15 Tn | 33069 lb	up to 40 Tn | 88184 lb
up to 400 min^{-1}	up to 150 min^{-1}
Torque motor	Roller bearing
	Double pinion and crown system, high precision, no backlash

High Torque Multitasking Head

Head and spindle orientation at any angle.

— Standard tools, no adapter needed.
— Automatic tool changing system.
— Standard range, availability of spare parts.
— Ease of use thanks to specific positioning cycle.

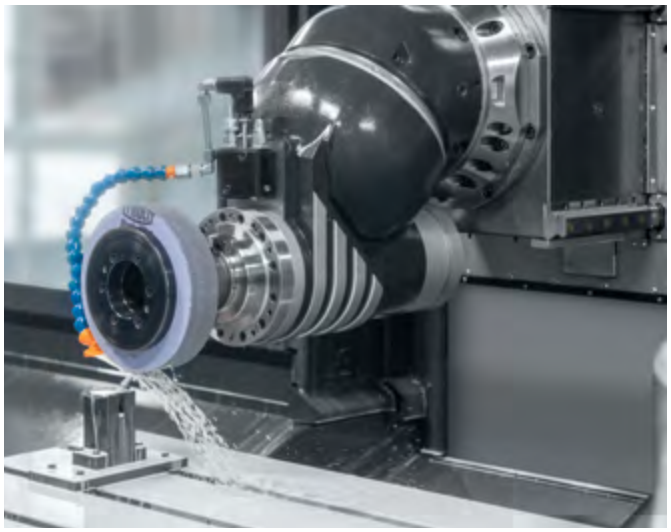
— 37 | 49 HP (S1)
— Up to 1222 Nm | 10815 in*lbf
— 5000 / 6000 / 7000 min^{-1}
— 2.5º x 2.5º / 0.001º x 0.001º



Mechanical transmission head with spindle clamping system: includes a clutch to clamp the spindle at any angle during turning operation.

The clamping system prevents bearing damage thanks to an internal retractable support ring.

Grinding capability



— Table mounted dressing unit.
— Wheel holder with integrated nozzle.
— Balancing unit.
— Full splash guarding.
— Fume extraction.
— Specific cooling system.
— Double protection for guideways and telescopics.
— Grinding cycles and functionalities by Soraluce Software Factory.

07.

Soraluce Software Factory

Smart HMI, Intelligent interface.

— Ergonomic and intuitive workspace.
— Soraluce's APPS available.
— Parallel work during NC program running.
— Minimized downtimes.
— Real time machine status.
— Energy consumption monitoring.
— Simplification of repetitive tasks.

Home Made

01

Modular and robust; configurable according to customer's requirements.

02

Own methodology; complete integration, approved in Soraluce.

03

Development of specific custom cycles.

04

Capability for automated system, flexibles lines, centralized tool magazines.

Softkeys & Customized masks

Manufacturing cycles

Dynamic collision monitoring

Advanced tool management

08.

Digital services

Advanced Digital Services, based on the Soraluce Data System comprehensive monitoring platform:

Reportya

Regular customized reports.

FactoryConnect

Machine park monitoring and integrations with corporate management systems (ERP, MES, etc.).

Autocheck

Self-Assessment using Fingerprint benchmark parameters.

JobManager

Traceablity of manufacturing orders, programs, tools and process incidences.

Emaintenance

Digital management of maintenance tasks.

OEEMonitor

Availability & Performance & Quality parameters calculation.

09.

Ergonomic & Safe

Tool changing system

Tool loading
non-stop machining

— Simple and ergonomics.
— Allows tool loading/unloading with machine in operation.
— Full safety for the operator.
— No downtimes:
  — Tool storage is protected from chips and coolant.
  — Inductive detectors protected.
— Advanced tool management options available on request.

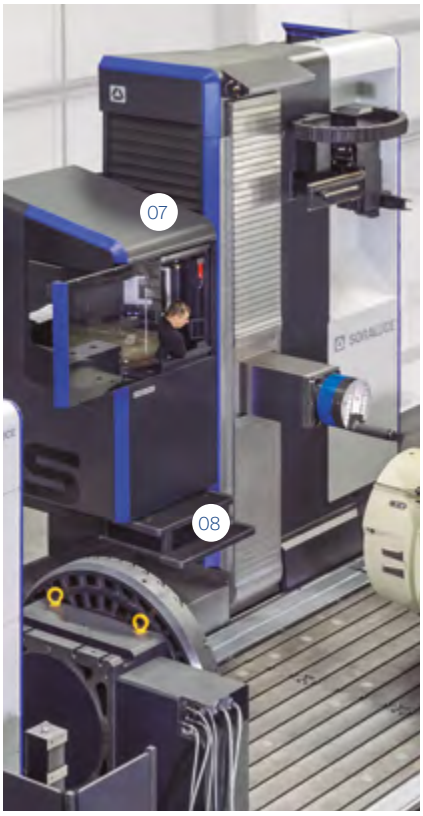
Totally reliable

— NC controlled.
— No impacts with head.
— Tool control.

Non-stop machining

Robotized tool changer available

Easy maintenance and accessibility



01 Accessible intervention areas.

02 Specific signals to indicate maintenance and service points.

03 Sliding shutters and doors to avoid the disassembly of panels.

04 Visible gauges and levels.

05 Ample areas to ease maintenance tasks.

06 Protection of the critical areas of the equipment.

07 Operator platform and access to machining area. Vertical movement available for FP and FS models (option).

08 Machine grease lubrication; consumption is kept to the minimum necessary.

Comfort pack

Focused to increase operator's comfort and productivity.

— Folding seat.

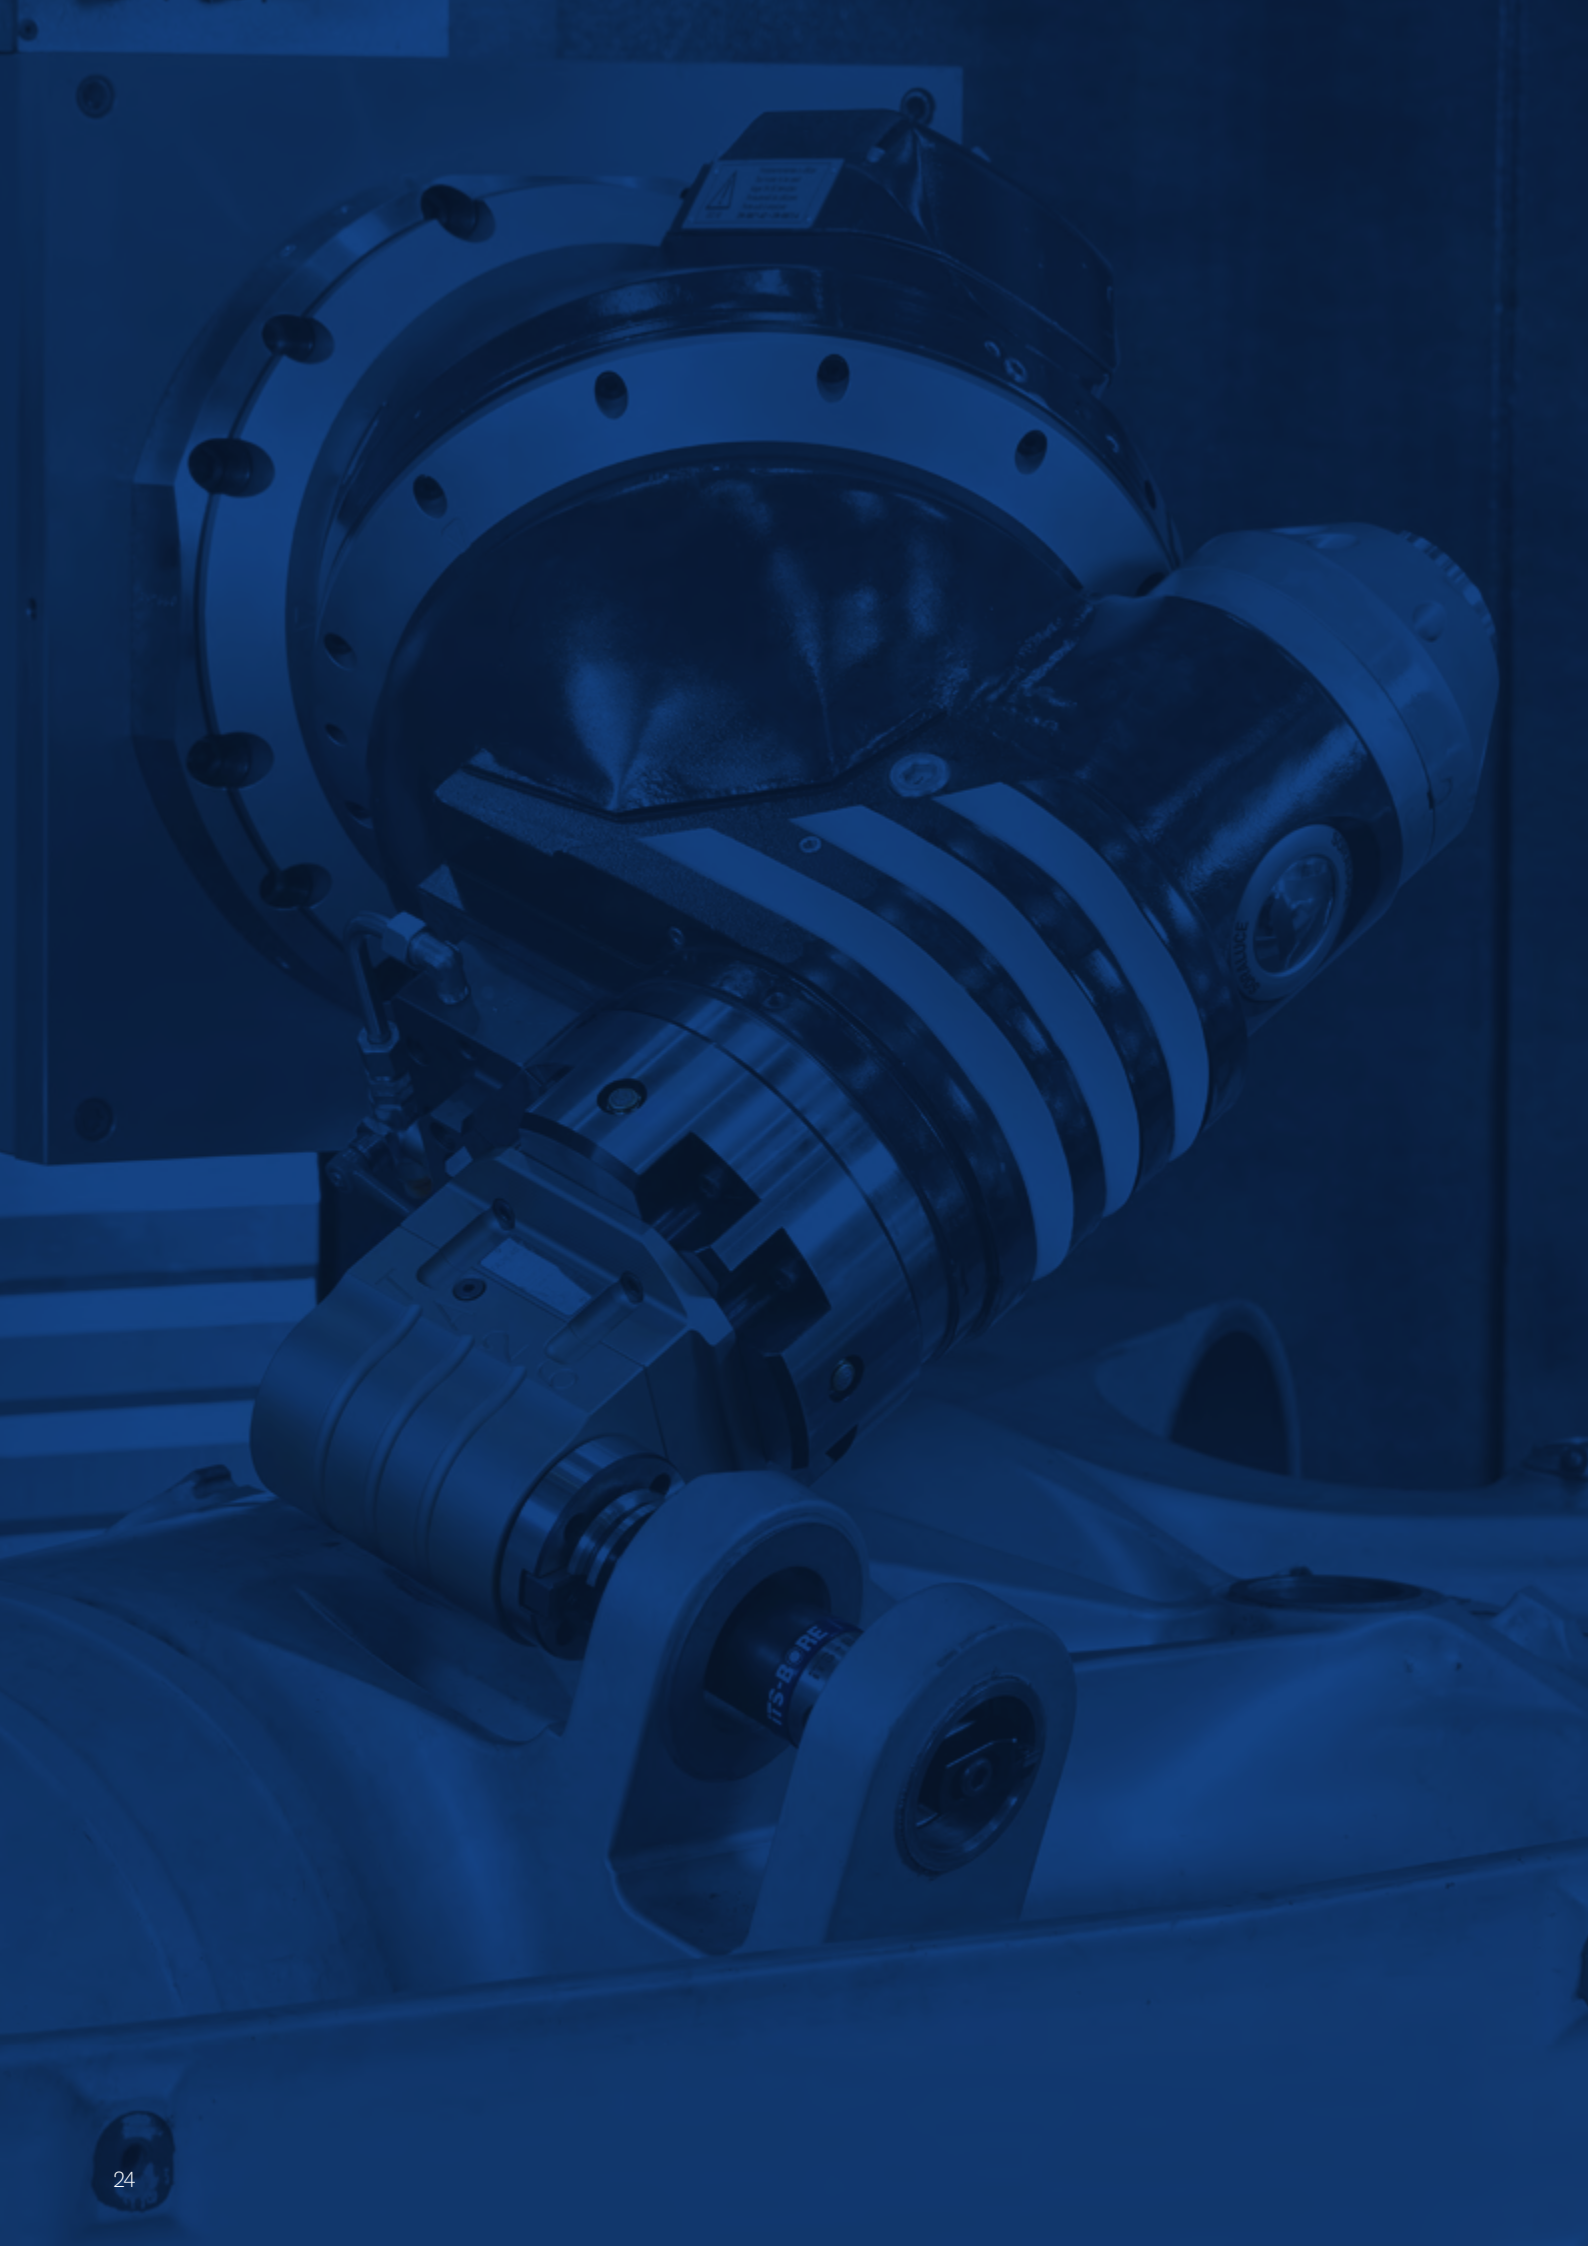
— Sound system.

— Extra space.

— Air conditioning (optional).

— Workbench with a panel (optional).

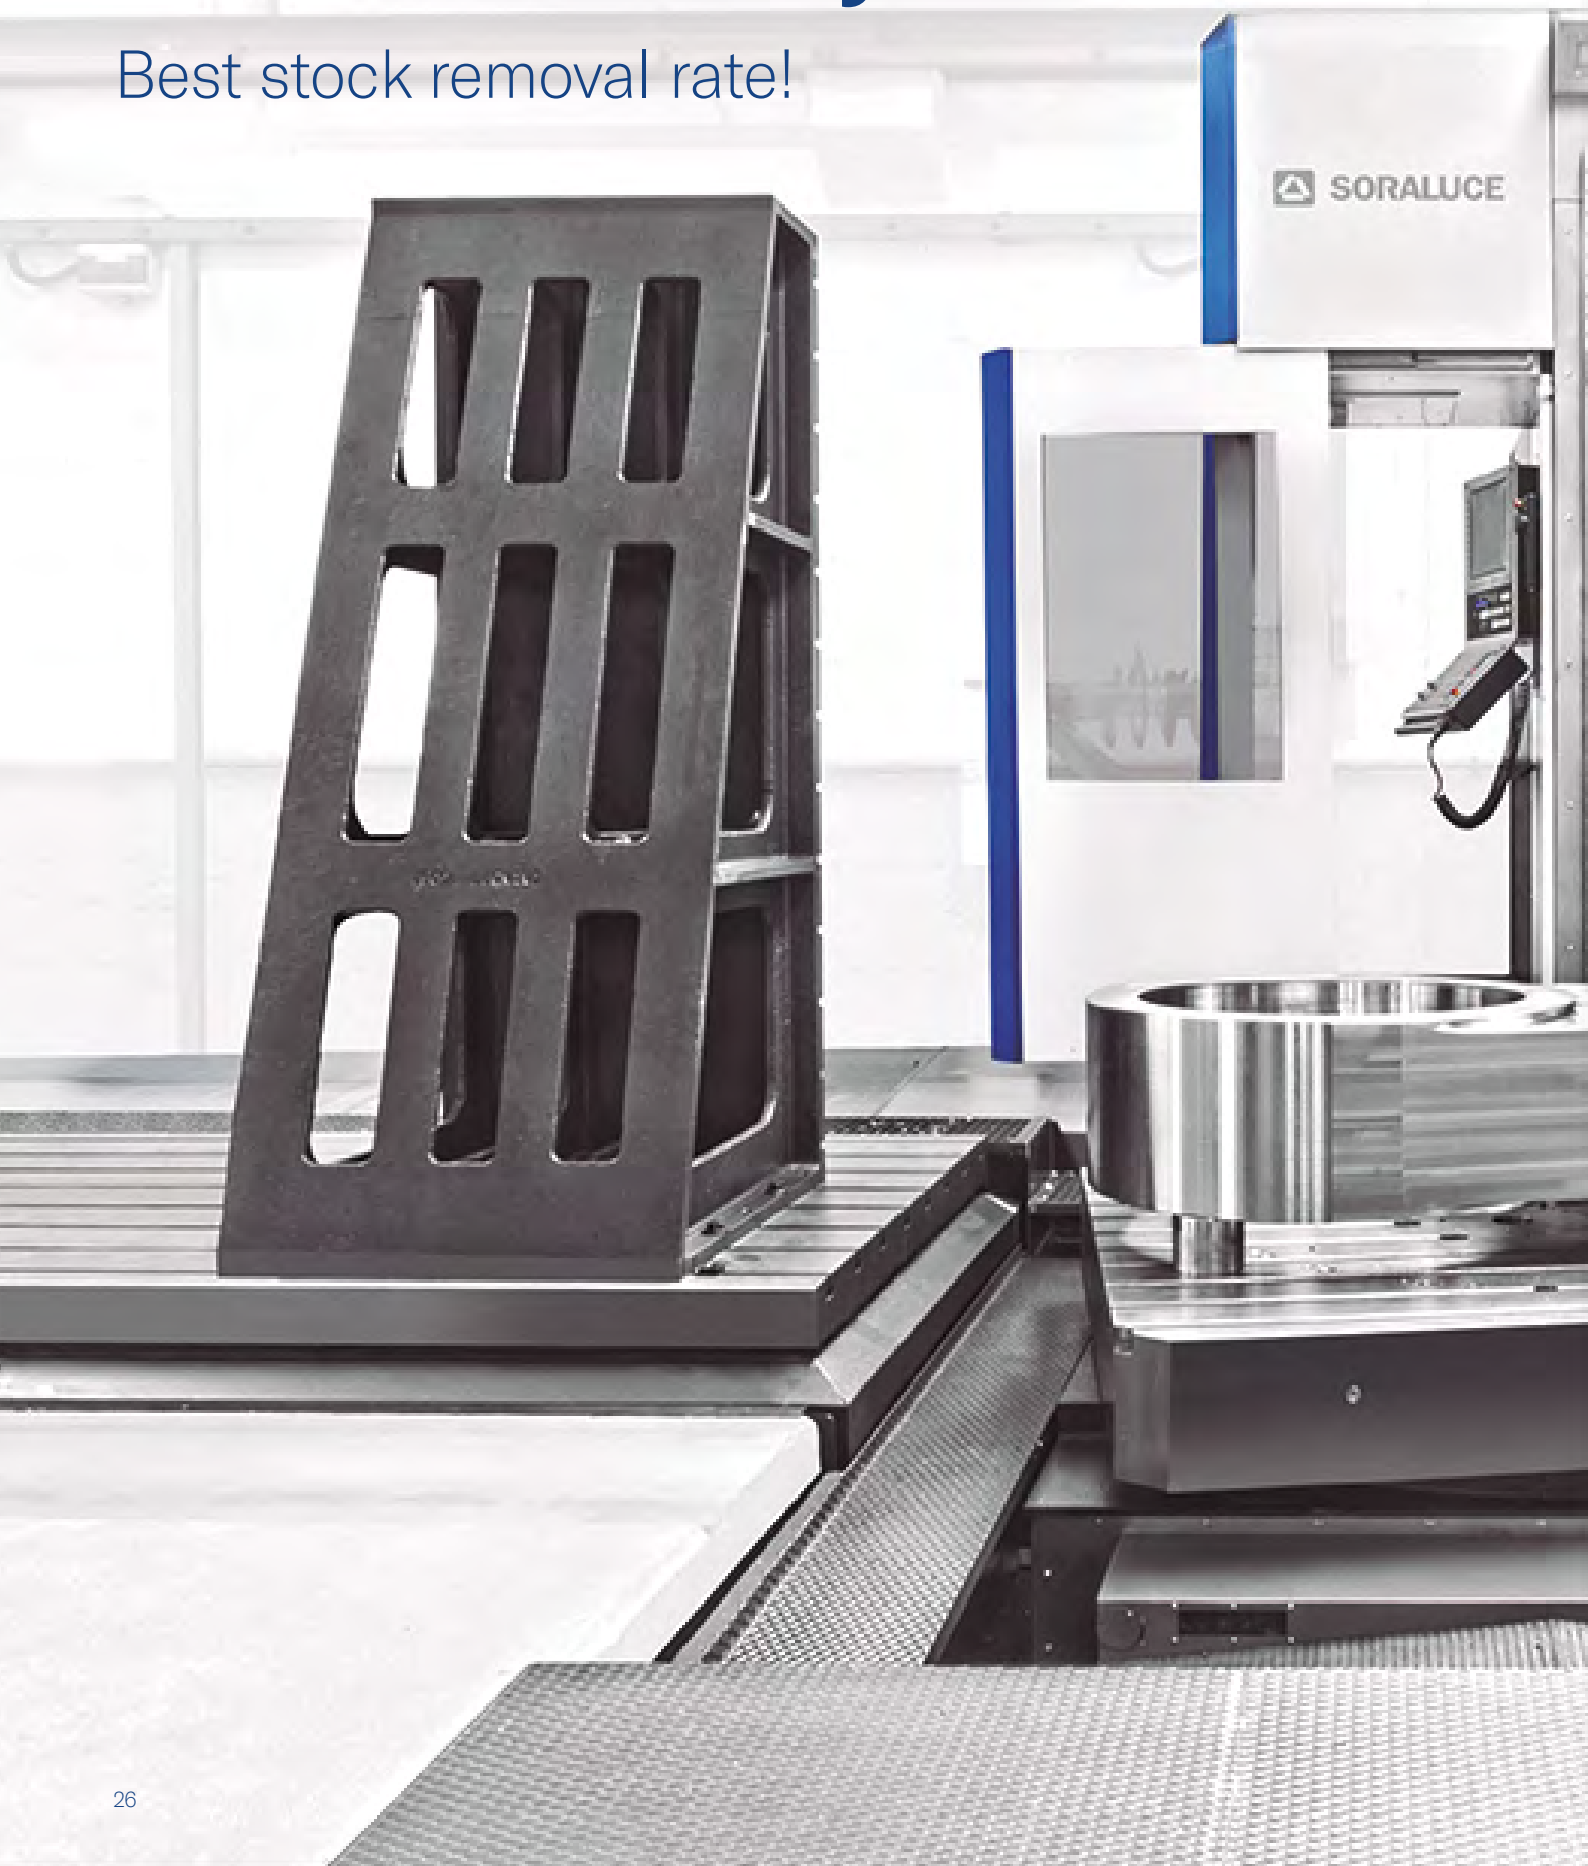
— Tool cabinet (optional).



Meet the machines

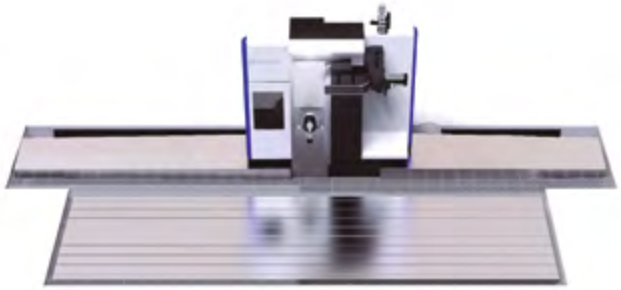
Productivity Line

Best stock removal rate!



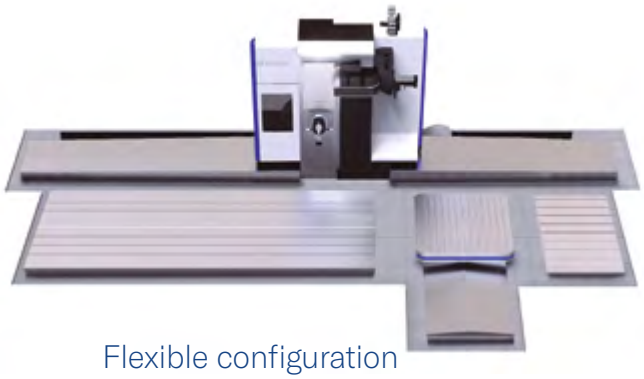
Choose the configuration of your machine

A versatile range



Basic configuration

Floor plate

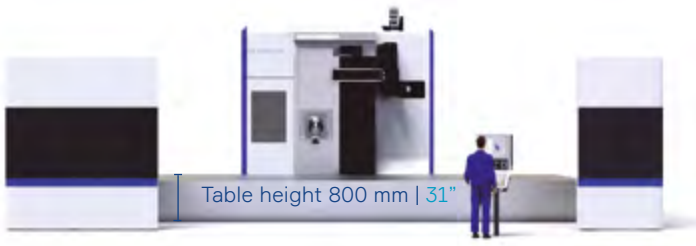


Flexible configuration

Minimum workpiece set-ups

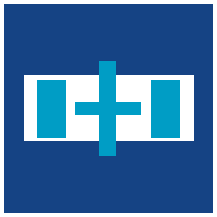
In & out

Portable rotary table

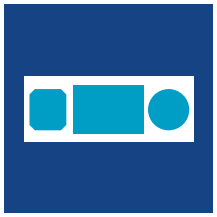


Ergonomic

Table at operator’s height



Pendulum machining

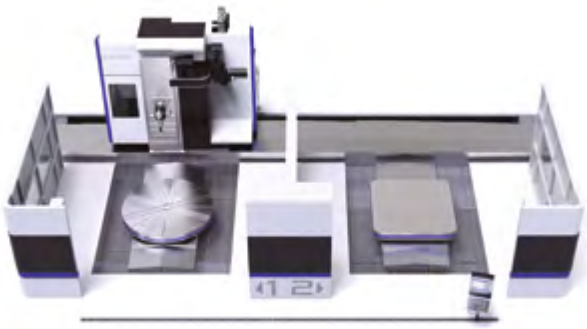


Several workstations

Palletized and flexible manufacturing systems

Automated Solutions

— Maximum efficiency.
— Reduction of set-up times.
— Downtime are minimized.
— Avoid human errors.



Multitasking configuration

Milling and turning workspaces

Duplex machine

Working with two simultaneous spindles

Duplex Machine

— Double production.
— Improvements in part precision; machining of the part in one single setup.
— One sole operator can control both machines.
— Reduced space.
— Fastest ROI due to high productivity.
— Different configurations available:
  - Single working area.
  - Pendulum working areas.
  - Pallet changing system.
— Duplex Pack by Soraluce Software Factory.
